Introduction

ADLINK's PCIe-GIE72/74 PCI Express® PoE+ frame grabber supports 2/4CH independent Gigabit Ethernet ports for multiple GigE Vision connections transferring up to 1 Gb/s per port. PoE+ provides up to 30W power and automatic detection for stable, reliable connections, reducing costs, simplifying installation, and easing maintenance burdens.

Multi-card Capture Capability

Any number of PCIe-GIE7x series cards can be installed in a single system without occupying any I/O resources, for multiscard single-system machine vision grabs. Wide operating temperature range supports integration with fanless computer for IA applications in harsh environments.

Comprehensive PoE Protection Secures Assets

Exclusive comprehensive PoE Protection prevents overcurrent and overvoltage, and automated power budget control adjusts PoE port power supply automatically, avoiding equipment damage.

Smart PoE management

Easy-to-use utility and API provide real-time PoE status monitoring and control, lowering maintenance costs and predicting possible failure in advance, while PoE power priority selection and PoE-based power on/off support more demanding applications.

License Management & ToE (Trigger Over Ethernet)

Integrated software License Management and advanced FPGA-based Trigger over Ethernet synchronizing multi-camera acquisitions significantly reduce ownership costs.
